EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

On page 1, line 5, --, now U. S. Patent Number 6,620,455-- has been inserted after "October 22, 2001".

The following is an examiner's statement of reasons for allowance:

Claims 1-6 are allowable because there is no teaching or suggestion in the prior art of an adhesive applicator for a web of corrugated board comprising the combination of a frame; an adhesive applicator roll which is disposed in the frame and drivable in rotation about a central longitudinal axis; a nip roll, which is disposed in the frame and drivable in rotation about a central longitudinal axis, at least one of the applicator roll and the nip roll being a displaceable roll; a nip between the adhesive applicator roll and the nip roll for a web of corrugated board to pass through, which comprises at least one liner web and a corrugated web; a force sensitive device for detection of an actual force which acts vertically on the web of corrugated board in the nip; a distance adjusting device for modification of the height of the nip by displacement of the applicator roll and the nip roll relative to each other substantially on a plane that is spanned by

the central longitudinal axes; and a control unit for comparison of the actual force with a given nominal force in the nip and for triggering the distance adjusting device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents disclose the state of the art with respect to corrugated board gluing apparatus including glue roller nip adjusting devices: Tokuno (US 4,319,947), Marschke (US 5,681,422), and Pallas et al (US 6,409,857).
